DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest the catalyst distribution on a catalyst carrier as described in claim 1, that is dimensioning the catalyst particles such that the center-to-center dimension between said particles on the carrier is made to substantially coincide with the sum of a double of a total dimension resulting by adding the length of a side chain to the radius of the main chain and the diameter of the catalyst particle. There is also no suggestion in the prior art for a person having ordinary skill in the art to modify any prior art reference to make the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1745

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 2004/0121221 to Suzuki et al. teaches a catalyst carrier in a fuel cell that includes atoms that can be bonded by covalent bonds. US 2005/0112451 to Lee et al. teaches Catalyst particles supported on the catalyst support in a fuel cell that may be nanoparticles having a particle diameter of 10 nm or less.
